Press Release

NEW TAGUS™ THERMAL TRANSFER PRINTERS SERIES T200/T300

The new TAGUS™ Thermal Transfer Printers are now available from Brady Australia Pty Ltd. They are ideal for a wide variety of low to medium volume THT label creation applications with capability of printing up to 4,000 labels per day. TAGUS™ printers are durable, technologically advanced, versatile and compact, making them ideal for applications where space is limited. Users can get the job done easily with user-friendly interface, new material sensors and fast label print speeds.

The T200 models prints at 200 dpi (dots per inch) while the T300 will print at 300dpi print resolution. Some features include unique collapsible ribbon hub, upgradeable flash memory, cantilever printhead mechanism, parallel, serial and USB communication and automatic connection type detection. They are also Windows compatible and the T300 has an optional network Ethernet card connection.

They both have selectable print speeds, from 2.000" (50.80 mm) to 10.000" (254 mm) per second. The TAGUS™ printers can be used for many different applications, such as producing packaging labels with logos, use by date labels, product labels with barcodes and many more, it all depends on your requirements with minimum label length 0.125" (3.18 mm).

For more information about the new TAGUS™ Thermal Transfer Printers please call Brady's Customer Service Department on 1800 620 816 or visit our website www.bradyaust.com.au.

The new TAGUS™ Thermal Transfer Printers are small, fast, versatile and affordable.
